Summary

A passionate and detail-oriented Full Stack Developer with 2 years of experience in building dynamic, scalable, and user-friendly web and mobile applications. Seeking an opportunity to leverage my skills in full-stack development to contribute to innovative and impactful projects.

TECHNICAL SKILLS :

Back-end Development:

- Implemented secure user authentication using JWT and Passport.js with session and token handling.
- Proficient in WebSocket for real-time communication (notifications, streaming, live dashboards).
- Strong foundation in Java concepts including OOPS, Multi threading, etc.
- Skilled in Node.js and Express.js for building RESTful APIs.

Front-end Development:

- **Proficient** in TypeScript, React.js, React Native, JavaScript (ES6+), HTML5, CSS3, and Bootstrap.
- **Experienced** with state management tools such as Redux and Context API.
- **Skilled** in developing responsive, mobile-first, and cross-platform user interfaces.

Database Management:

- Solid knowledge of SQL and MySQL
- Strong experience with MongoDB and Mongoose for schema design and data modeling.

Additional Skills:

- Deployment & Containerization: Basic knowledge of Docker and Nginx
- Version control: Git, GitHub

EDUCATIONAL QUALIFICATION :

1. Bachelor of Engineering (BE) | CSE | Rajajeswary College of Engineering | Bangalore - 2023
2. Pre-University Course (PUC) | Alvas PU collage | Managlore - 2019
3. Secondary School Leaving Certificate (SSLC) | Hassan - 2017

PROFESSIONAL EXPERIOENCE :

1.Full Stack Developer | Schmid Vision sift | Bangalore, India | Current

- Collaborated with cross-functional teams to gather requirements and deliver solutions.
- Implemented secure authentication using JWT and session tokens.
- Built dynamic, responsive UIs using React.
- Integrated third-party APIs and optimized backend performance.
- Debugged and resolved complex application issues efficiently
- Developed and maintained scalable full-stack applications using the MERN stack.

2 Web Developer Intern | Compsoft Technology | Bangalore, India

- Participated in bug fixing and UI improvements on live projects.
- Wrote unit tests for better code reliability and maintainability.
- Contributed to web application development and feature enhancement

PROJECTS :

1. Mobile and PWA Application for Real-time Notifications

- **Description:** Designed and developed a real-time notification system, initially as a mobile application for **iOS and Android** using **React Native**, and later extended the same functionality to a **Progressive Web App (PWA)** using **React**.
- **Technologies:** React Native, React (PWA), Node.js, Express, MongoDB, Firebase Cloud Messaging (FCM), Web Push
- **Key Achievements:**
 - Implemented secure login with session-based FCM token registration and cleanup.
 - Used **Firebase Cloud Messaging** for Android push notifications and **Web Push** for iOS via the PWA.
 - Replicated native app features in the PWA, ensuring consistent behavior and user experience across platforms.

- Built reusable UI components such as dynamic notification badges, session-aware headers, and alert displays.

2. Dashboard for Person Re-Identification (ReID)

- **Description:** Developed a comprehensive dashboard application to support person re-identification (ReID) tasks, enabling effective visualization, search, and analysis of individual tracking data.
- **Technologies:** React, Node.js, Express, MongoDB, Docker,
- **Key Achievements:**
 - Integrated advanced search and filter capabilities to efficiently manage large volumes of ReID data across multiple camera sources.
 - Designed a responsive and user-friendly interface with real-time data updates to enhance tracking accuracy and operator efficiency
 - Enabled detailed profile views and history tracking to assist in monitoring and comparing re-identified individuals across time and location

3. Configuration Tool for Live Camera Streams

- **Description:** Developed a web-based dashboard that allows users to draw configuration lines on real-time camera frames to define regions of interest or motion detection zones.
- **Technologies:** React, Node.js, Express, FFmpeg, Docker
- **Key Achievements:**
 - Integrated FFmpeg to stream camera feeds via URL and capture live frames dynamically.
 - Implemented interactive line-drawing tools directly over video streams for accurate zone configuration.
 - Delivered a responsive, user-friendly interface for efficient configuration management.

4. Image Annotation Application

- Created a tool for annotating images for analysis and ML training.
- **Technologies:** React, Node.js, Express, MongoDB
- **Key Highlights:**
 - Draw shapes, add text, place markers.
 - Stored structured annotations with real-time editing.

5. Company Website Development

- **Description:** Designed and developed a professional, fully responsive website for a corporate client to enhance their online presence.
- **Technologies:** React, Node.js, Express

- **Key Achievements:**
 - Built an SEO-friendly website with dynamic content management capabilities to allow non-technical users to manage site updates easily.
 - Delivered a custom-tailored solution that met all client-specific branding and functionality requirements.
 - Improved user engagement and accessibility through modern UI/UX design and mobile responsiveness

6. User Authentication System

- Built a secure login system with persistent sessions.
- Technologies: React, Node.js, Express, MongoDB, Passport.js
- Key Highlights:
 - JWT-based token authentication with cookie handling.
 - Smooth session persistence and access control.

CERTIFICATION :

- full stack development (Pentagon Space Bangalore).
- React, MongoDB, JavaScript (Udemy).

DECLARATION :

I hereby declare that the information provided is true to the best of my knowledge.
